Finale®	PrintMusic	SongWriter	NotePad	Composing and Arranging Time Savers
■	4 layers only	4 layers only	4 layers only	Define up to four layers of music per staff with two independent voices per layer
■	1 or 5 lines	5 lines (plus tablature)		Number of staff lines per staff from 0 to 100
■	(plus tablature)			Create any multiple of staves and measures up to 32,768
■	24 stave limit	8 stave limit	8 stave limit	Use standard or non-standard key signatures
■	Standard only	Standard only	Standard only	Automatically avoid collisions of mid-score and mid-measure clefs, 2nds, and unisons when using layers
■	Layers, 2nds, and unisons	Layers, 2nds, and unisons	Layers, 2nds, and unisons	Play any range of measures at a specified tempo with on-screen Playback Controls
■				Set-up Wizard automatically assigns General MIDI patches and channels
■				Easily set up key and time signatures using the Set-up Wizard
■				Automatic final barline
■		Page View only	Page View only	View a score in either scroll view (continuous staff) or page view
■		Page View only	Page View only	Scroll music on-screen during playback in page or scroll view
■	2-3 voice harmonies	2-3 voice harmonies		Band-in-a-Box Auto Harmonizing automatically adds two to six-part harmonies of selected styles
■				Drum Groove creates custom drum parts instantly
■		Limited		Control the distance between a staff system and the staff system above
■				Enter an unlimited number of notes per measure
■				Control stem direction individually
■				Control the number of measures in each staff system
■				Transpose using chromatic, diatonic, enharmonic or modal methods
■		Transpose		Transpose, rebar, or rebeam music with single commands
■				Instantly switch views between the score and individually linked parts
■				Use on-screen rulers to position score elements
■				Add graphic repeat signs and text repeat markings
■				Reduce a score, page, staff system, note group or single note down to 5%, or enlarge it up to 999%
■				Extract individual parts from a score, with separate page layout control for each part
■				Adjust measure widths
■				Choose from over 30 pre-designed score templates to help you quickly prepare professional scores
■				"Optimize" the conductor's score by hiding empty staves
■				Automatic on-screen range checking
■				Create mid-measure clefs
■				Save multiple MIDI/instrument setups
■				Re-quantize any notes in any region entered from any note entry method
■				Protect scores with automatic backup
■				Capture music as you play, then convert to notation later Record one "track" while playing back others
■				Define your own noteheads; change the shape of any notehead
■				Specify separate time signatures for display and beaming control
■				Use different time and key signatures in each staff
■				Latin percussion rhythms included
■				Explode" scores to create instant orchestrations
■				"Implode" scores to create instant piano reductions
■				Add Cue Notes - easily place cue notes on any staves in any layer at any percentage
■				Align/Move Dynamics - vertically align all selected dynamics, expressions and hairpins
■				Automatic Barlines - place double-barlines automatically before all key changes and a final barline at the end of the score
■				Automatic Dynamics Placement - automatically places dynamics on the score based on MIDI key velocity
■				Canonic Utilities - transforms the selected region using inversion, retrograde, transposition or any combination of these
■				Cautionary Accidentals - allows various forms of cautionary accidentals added to your score including display on all notes
■				Change Fonts - Change fonts globally for text blocks, staff names, group names and lyrics
■				Change Stem Direction - changes the stem direction of notes on the middle staff line to follow the direction of the melodic line
■				Change to Default Whole Rests - allows you to change all the whole measure rests in the selected region to default rests
■				Change to Real Whole Rests - allows you to change all the default measure rests in the selected region to real whole rests
■				Check Range - verifies the selected instruments range with setting for beginner, intermediate and advanced players
■				Check Region for Durations - checks the selected region for any measures that have too few or too many beats
■				Chord Morphing - generates a variety of smooth between-chord transitions
■				Chord Realization - generates four-part realizations of a triad based on major key and scale degree specified
■				Chord Reordering - finds new placement options for chords
■				Chord Splitting - creates subsets of the original chord
■				Classic Eighth Beams - beam eighth notes together when using common time over the selected region
■				Clear Lyric Positioning - will reset any changes you've made to your lyric baselines in the selected region
■				Clear Measure # Positioning - clears all measure number positioning in the selected region and sets it to the default position
■				Common Tone Transposition - creates a series of transpositions where one note is equal to one note of the original chord
■				Easy Harmonics - string harmonics fast and easy
■				Easy Tremolos - create tremolos for display and playback
■				Find Range - Run this plug-in to find the highest and lowest notes in the selected region
■				Frequency Modulation Chord Generator - generates a series of chords with increasing complexity and texture
■				Global Staff/Group Attributes - Apply the same staff or group attributes to any staves or groups
■				Handbells Used Chart - instantly creates a chart based on note usage
■				Latin Percussion - automatically adds pre-created Latin percussion grooves in a variety of styles
■				Melodic Morphing - creates a melodic transition from one melody to another
■				Menu Shortcuts - write your own script to automate common tasks
■				Midline Stem Direction - changes the stem direction of notes on the middle staff line to follow the direction of melodic line
■				Mid-Measure Repeats - automates the process of creating repeats in the middle of a measure
■				Move Rests - lets you move rests in the selected region to a different vertical position
■				Number Repeated Measures - Place numbers over measures that are repeated again and again
■				Piano Reduction - creates a piano reduction of the selected staves
■				Rhythmic Subdivisions - Change the selected region to eighth notes, or divide all your notes in half
■				Single Pitch - changes all the notes in your selected region to the specified pitch
■				Smart Playback - adds a playback effect to glissandi, hairpins and trills
■				Space Systems - automatically positions your staff systems evenly on each page
■				Split Point - lets you reset the split point between two staves in the selected region
■				Tie Common Notes - inserts a tie between any two successive notes if the notes have the same pitch
■				Update Brackets & Groups
■				Vertical Collision Remover
■				Virtual Fundamental Generator - automatically gives the appropriate "root" for any selected group of staves
■				Voice 2 to Layer - moves Voice 2 entries to the selected layer
■				Word Extensions - add or remove word extensions to and from your lyrics
■				Split Point - lets you reset the split point between two staves in the selected region
